

ABBREVIATED LIST OF SERVICES 2023

WELCOME

The Beach Delegation of the Mijas Town Hall, welcomes you to our town. Our main aim is to serve our neighbours and visitors efficiently, always seeking the satisfaction of their needs and demands, and for this we work to improve our services on a continuous basis. So everyone can enjoy our beaches; we ask your collaboration and implication in carrying out good use of the wide range of supplied services and facilities, as well as respect for the environment and the rest of the users of the beach. Thank you very much and enjoy our beach!

MANAGEMENT POLICY

The Town Hall of Mijas with the implementation of a Management System wants to offer its visitors a protected ecosystem with a high natural value, as well as quality services according to the requirements of these standards.

The Town Hall is committed, within its possibilities, to establish the technical and economical means necessary to stop pollution and carry out prevention measures, as well as eliminate as much as possible any impact on the environment as a consequence of your activities. It guarantees, in turn, a follow-up of all those activities carried out on the coast, establishing mechanisms for continuous improvement, in collaboration with all sectors of the municipality, ensuring the evolution of both the quality of the environment and the services provided.

In the development of the activities that take place on the Mijas coastline and on the beaches of: Calahonda-La Luna Beach-Royal Beach, Alhamar Beach, Calahonda, Calahonda-Riviera Beach, El Bombo Beach, Cala Beach, Las Doradas Beach, El Chaparral Beach, and El Charcón Beach, the Town Hall is committed to establish initiatives that ensure compliance of legal and regulatory requirements, as well as the user requirements or other requirements applicable to activities that are developed on the beach, as well as, promote the participation of all staff and users in the protection and improvement of the coast, through training and awareness mechanisms, and always with an emphasis on communication, at all levels.

The Town Hall regularly defines and evaluates the quality and the environmental objectives of the beaches, in order to promote its continuous improvement.

The coast belongs to everyone, that is why the Town Hall wants to involve everyone that uses the beach, as well as all those who carry out their activities on the beach, in the present project, promoting their collaboration, and seeking the satisfaction of all the people who in one way or another enjoy the beaches of Mijas.

In this line of environmental protection and quality, the rules and regulations that rule the beaches of Mijas are from now on, the following:

- The identification and evaluation of environmental impacts derived from the management of beaches, and this way, reduce or eliminate as much as possible, in order to prevent environmental pollution, and thus achieve the continuous improvement of the Management System.
- Compliance with current legislation and regulations, applicable to the integral management of the beaches of Mijas, as well as the quality of its waters and the services provided to users.
- Establish goals and provide the necessary resources, which will be reviewed and updated periodically by the delegate of the Beach Department, to ensure the continuous improvement of the environment and the prevention of pollution.
- Keep watching out to save natural resources, search to improve the quality of the processes carried out, minimizing the use of said resources using eco-efficiency methods.
- The implementation of environmental education and training plans continues with the aim of raising awareness among both the employees and the users of the beaches, in the protection of the coastal environment.

- Do not spare any effort to meet the needs and expectations of the users of our beaches, this way we will continuously increase their satisfaction.
- As well as committing to the continuous improvement of the Management System.

- Do not leave children unattended. Request an identification bracelet from the lifeguard company.
- Be careful of dangerous sea conditions.
- From 12 noon to 4PM, be careful of the heat. Pay attention to the updated Solar Radiation Index.

ABOUT OUR COAST

The coast of Mijas has a sea bed with a large biodiversity with European, African, Atlantic and Mediterranean species. The seabed of Calahonda was classified as a Special Area of Conservation (SAC ES 6170030 Calahonda) in August 2015 to ensure the conservation of the habitats and the species that live in them, in an area of 1403.57 Ha. Its uniqueness is due to the shore of the natural range of habitat and home to unspoilt stretches, where abundant vegetation flourishes, especially the Oceanic Poseidon. Also of great value, is the existence of Gorgonians (a type of coral) and the fact that the area has cetaceans.

GOALS PLANNED FOR 2023

- Reach 80% satisfaction level of the user.
- Reach zero level of non-conformity at the Clean Point of the Municipal Services in La Cala.
- Construction of the Coastal Path from La Cala de Mijas to Fuengirola.
- Carry out 5 environmental education campaigns on the beach.
- Improvement of the equipment on the Coastal Path.
- Improvement of the beach equipment. Changes on the WC units. Changes on the rescue and lifeguarding service unit in La Cala and El Bombo. New surveillance towers. Change on the showers.
- Renovation of informative and environmental signs.
- Improve the information on the beach through the lifeguard towers.
- Update of the beach bylaws.
- Elimination of invasive plants and planting of local species in Mijas.
- Own production of 1,000 cuttings of local plants.
- 1.8 m wide concrete podotactile walkways on the beaches with universal accessibility.

ENVIRONMENTAL ASPECTS

There has not been any notable event that could be considered significant. The small incidents that may have occurred are within normal limits.

The quality of our seaside water has been analysed and is within the legal parameters that declare our waters suitable for bathing.

INDICATORS

There are a series of indicators established, with the aim of guaranteeing the quality of our services and that can be consulted in the extended service letter, available to the public from the Tourist Information Office, The Delegation of Environment and Beaches of the Mijas Town Hall. On behalf of The Beach Department, we will continue working for the welfare and safety of our users.
