

# HOW TO RECYCLE IN MIJAS

*"Our commitment with environment"*

**GLASS**

**PLASTIC**

**PAPER**

**ORGANIC**

**ALL OTHER RUBBISH**

## MUNICIPAL COLLECTION SERVICE OF FURNITURE

It is a municipal free service. You must call in advance to notify them about the type of furniture or goods that are going to be deposited outside your property.

**Telf. 648 960 541**

*From 8am till 3pm, Monday to Friday*

Glass bottles and jars (no bottle tops or stoppers)

Do not throw any rest of glass or chinaware or silverware. They must go in the grey container. **Bulbs or any other kind of glass are not included. They must be taken to the Clean Point.**

Plastic containers (PET PVC, polypropylene, tins, cartons ,etc)

*You can deposit them without a bag. If they are folded, the volume of the container is reduced and that improves the efficiency of the container and saves energy.*

Folded boxes, magazines, newspapers...

*They must be stain and metal waste free such as staples or coils.*

*Milk cartons are not included since they are plastic containers and they must be deposited in the yellow container.*

Food leftovers, fruit skin, fishbones, eggshells, coffee grounds, plants, napkins or used paper towels...

*With the waste included in this container, COMPOST can be made. This is a material that can be used as fertiliser.*

Nappies, wipes, porcelain and ceramics, pet litter sand, little toys, dummies, baby bottles, chewing gums, cigarette butts and other non organic elements

This is waste that can't be neither recycled nor made compost.

**THIS WASTE ABOVE CAN BE DEPOSITED AT ANY TIME OF DAY**

**FROM 9 PM TILL 12 PM IN WINTER FROM MIDNIHT**

This non organic waste is treated in a different way and must be separated for its correct recycling. By collaborating in the separation of glass (**GREEN**), light plastic containers (**YELLOW**), and paper (**BLUE**) we save an important amount of energy, water and natural resources which are important in our economic, social and environmental development and they improve the quality of life of our citizens.

This waste cannot be deposited in the container at any time of the day, to avoid bad smells or attract insects and rodents. By respecting the timetable we help to improve our urban environment.

## CLOTHES AND SHOES

The clothes and shoes we don't use anymore have a better ending than the dumping site. Donating or depositing them in these containers promotes its reuse or recycling into other textile materials.

## LA CALA CLEAN POINT

Access through the roundabout which connects Av. Mare Nostrum and Av. del Golf. Next to the building FOREM AGUAS

**TIMETABLE: From Monday to Saturday 8.00am 'till 6.00pm**

**TELF. 952492178**

### FREE SERVICE ONLY FOR INDIVIDUALS

Dangerous waste and those with no specific container in the street are deposited here:

*Appliances and IT equipment, sprays, x ray files, bulbs, fluorescent lights, oils, wood, textiles, batteries, chargers, solvents, paint, metals, rubble, plant waste, big plastics, etc.*

## USED HOME OIL

Separating the used vegetable oil and recycling it to make soap or biofuel, avoids water contamination and makes it more efficient to treat waste waters. This will directly affect the quality of the beach water.

These containers are located in the main streets and close to commercial areas. Used oil must be deposited inside well-closed plastic bottles.
